unfound

01 / 04

Be reached, not found.

Every school. Every clinic. No one looks you up.

A safe address for family-violence survivors. Services can reach her after she moves. No employee, admin or operator can look her up.

Full address	7fQ2…a9Lk
School zone	c41E…0pZr
Contact relay	Hh8v…3sTd

Your address, held by no one.

WHO SEES WHAT

One address. Three sealed parts. No master key.

Linh's new address — SEALED

- **Full address** — addrfull
  Street, unit, postcode · opens only by quorum
- **School zone** — addrzone
  Catchment only
- **Contact relay** — addrcontact
  Suburb and relay number

L	**Linh · survivor** — OWNER	Seals once on her phone. Sees every attempt in "Who looked".
S	**School** — ZONE ✓	"In Footscray North zone." Never the street.
G	**GP clinic** — RELAY	Suburb and a relay number to call.
C	**Court mail** — AT PRINT	The street opens only as the label prints.
P	**Police** — 2 OF 3	Break-glass: two approvers sign, one view, then revoked.
A	**IT admin** — 412	Sees ciphertext. A self-grant stays pending.
U	**Unfound** — NO KEY	Stores ciphertext only. Cannot decrypt anything.

Not covered: being followed or GPS-tracked, people who already know the address, copies at services not on Unfound. One part of a safety plan.

BUILT ON TIDE

Authority lives on Tide's Fabric, not with any person.

01 **Seal in the browser**
`doEncrypt` per tag. Keys exist only as shards across independent ORK nodes.

02 **One role per part**
`_tide_addrzone.selfdecrypt` and friends, checked by the ORKs before they help decrypt.

03 **No one alone**
Every grant is a Quorum-Enforced Governance change set. A lone commit returns `412`.

04 **Sign in, bound**
TideCloak BYOiD sign-in with DPoP: a stolen token is useless elsewhere.

7 personas	**68s** auto-played story	**15** Tide operations

THE PROBLEM

A new address is the most dangerous data a survivor owns.

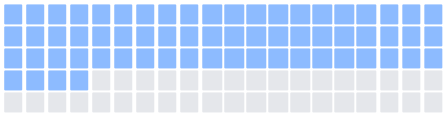

AU · PARTNER VIOLENCE

1.5M women have experienced violence from a **previous** partner: nine times more than from a current one.[1]

AU · LEAVING

64% moved out when it ended: **866,700** new addresses for schools, GPs and courts to store.[1]

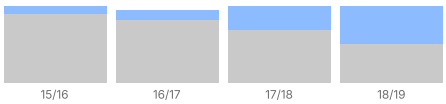

AU · SEPARATION

2 in 3 women killed by a partner in NSW were killed after leaving or while separating.[2]

AU · INSIDERS

2,215 misuse-of-information allegations in 4 years, 7 Queensland agencies. Outside police: **4.8×**.[3]

UK · REGULATOR

4 of 7 organisations reprimanded over victims' data had sent a safe address to the abuser.[4]
